[Jackson Hole Mountain Resort](#) might be packed full of **luxury accommodations**, but nearby Jackson has (until recently), been lacking in that department. As the first luxury hotel to be built in **15 years** in Jackson, the [Hotel Jackson](#) opened in June to rave reviews. Full of western-chic styling, the property offers **58 guest rooms**, six of which are suites. All rooms feature **fireplaces**, spa-like bathrooms, and L'Occitane amenities. The hotel is also in a prime location; walking distance to all of Jackson's [best restaurants](#) and in the winter they will run a **free shuttle** to Snow King and Jackson Hole Mountain Resort. You can bet we have our eye on this property for inclusion into our [List of Ski Country's 38 Essential Hotels](#).
